

This listing of the claims will replace all prior versions and listings of the claims in the application.

Listing of the Claims:

1. (Currently Amended) An oven comprising:
a housing having a front side with an opening therein ~~in the front~~ and with electric heating elements in the interior thereof for cooking pizza;
a removable tray inserted into the opening in the housing and adapted to carry the food to be cooked thereon;
a electronic user operable control integrated into the front side of the housing, and ~~the control having two temperature selection user selectable controls thereon, one higher and comprising a first user selectable temperature selection control causing the oven to cook~~ operable to activate the electric heating elements at a first temperature appropriate for cooking pre-baked crust pizzas and one lower a second user selectable temperature selection control causing the oven to cook operable to activate the electric heating elements at a second temperature appropriate for cooking self-rising crust pizzas.

Claim 2 (Cancelled).

3. (Original) An oven as claimed in claim 1 wherein the opening in the front of the oven is at least about 3 inches to accommodate a pizza the crust of which has risen in the oven.

4. (Currently Amended) A cooking oven comprising:

a housing having a front side with an opening therein ~~in the front~~ and with electric heating elements in the interior thereof for cooking pizza, the opening in the front side ~~of the oven~~ being at least about 3 inches;

a removable tray inserted into the opening in the housing and adapted to carry the food to be cooked thereon;

a electronic user operable control integrated into the front side of the housing, the control having a time display, ~~two~~ high and low temperature selection buttons, and two ~~timing~~ cooking time changing buttons, the control connected such that (1) when a user operates the ~~selects a~~ high temperature selection button, the control ~~causes the oven to cook~~ activates the electric heating elements at a first temperature appropriate for cooking a pre-baked crust pizza and defaults to a cooking time appropriate for a pre-baked crust pizza, (2) when a user operates the ~~selects a~~ low temperature button, the control ~~causes the oven to cook~~ activates the electric heating elements at a second temperature appropriate for cooking a self-rising crust pizza and defaults to a cooking time appropriate for a self-rising crust pizza, and (3) when the user presses one of the ~~timing~~ cooking time changing buttons, the control ~~changing~~ changes the ~~time of cooking time~~ cooking time upwards or downwards as selected by the user.

5. (New) An oven as claimed in claim 1 wherein the first user selectable temperature selection control further activates the electric heating elements for a first predefined period of time; and the second user selectable temperature selection control further activates the electric heating elements for a second predefined period of time.

6. (New) An oven as claimed in claim 5 wherein the control further comprises a control arrangement for varying first and second predefined periods of time upward and downward.
